MS Business Analytics candidate (LMU, May 2026) with 2+ years of experience in ETL pipeline engineering, marketing analytics, and ML modeling. Two-time national consulting competition champion. Proven ability to translate data into business decisions using Python, SQL, and Tableau.

EDUCATION

Loyola Marymount University <i>M.S. Business Analytics</i>	Aug 2026
University of California, Irvine <i>B.A. Psychological Sciences</i>	June 2024

WORK EXPERIENCE

Polis Assist <i>Data Pipeline Consultant</i>	Jun 2025 – Present
- Engineered ETL pipelines transforming raw parking data into deployment-ready datasets, cutting city onboarding time by 40% across 5+ municipal clients - Reduced import errors by 30% across 5+ city rollouts by architecting field-to-schema mappings and automated data validation checks - Developed automated address-search import packages, eliminating 60% of manual processing steps and accelerating municipality go-live timelines - Authored test plans, acceptance criteria, and technical docs; partnered with engineering on cross-functional DEV validation, compressing QA cycle time and shipping cleaner releases	
Dad Brand Apparel <i>Data Analyst Intern</i>	Sep 2024 – Jun 2025
- Analyzed 500K+ customer interactions via Python and SQL to uncover segmentation opportunities and behavioral trends, driving a 25% lift in conversion rates - Constructed inventory demand-forecasting models that reduced stockouts by 30%, improving in-stock availability during peak sales periods - Applied cohort analysis and attribution modeling across paid and organic channels to refine ad targeting, improving ROAS by ~15% - Automated Tableau KPI dashboards, cutting manual reporting time by 70% and enabling real-time decision-making for the merchandising team	
Dreams for Schools <i>Operations Intern</i>	Sep 2023 – Dec 2023
- Migrated 2,500+ CRM records and deployed automated follow-up workflows, cutting manual outreach time by 50% - Designed financial dashboards from historical data that directly shaped 20% of annual budget decisions	
UCI Student Center & Event Services <i>Crew Lead</i>	Nov 2022 – Jun 2024
Supervised a 20-person crew across high-volume night shifts; coordinated logistics for events of up to 1,500 attendees	

PROJECTS & AWARDS

IDEAcorns National MBA Consulting Competition — 1st Place (2025 & 2026)	Jan–Mar 2025 & 2026
- Two-time national champion (2025 & 2026) advising early-stage tech startups on go-to-market strategy, financial modeling, and investor-ready deliverables; presented findings directly to founders and investors - Modeled 3-year unit economics and ROI scenarios for AutoDive (aquaculture automation); crafted pricing, funding, and GTM strategy for Tipzy (AI-powered jukebox)	
U.S. Treasury Yield Forecasting — Python, TensorFlow, LSTM/CNN/FNN	
Engineered 30+ macro/yield-curve features; constructed regime-aware neural models achieving ~65% directional accuracy out-of-sample vs. 52% naive baseline	
Healthcare Price Transparency — Python, gradient boosting	
Developed an ML pipeline predicting hospital procedure prices across the U.S. ($R^2 = 0.72$); identified top cost drivers and translated findings into policy recommendations	
EPL Transfer Narrative NLP Pipeline — Python, NLP	
Architected an NLP pipeline classifying transfer rumor credibility at 78% accuracy by extracting sentiment, stance, and hedging signals from multi-source data	

SKILLS

Technical: Python (Pandas, NumPy, scikit-learn, TensorFlow), R, SQL | Tableau, Power BI, Excel (advanced), AWS, Docker, Git, GIS
Analytics: ETL pipelines, predictive modeling, time-series forecasting, NLP, A/B testing, cohort analysis, customer segmentation, data governance
Business: Requirements gathering, stakeholder management, financial modeling, go-to-market strategy, Agile/Scrum (Jira)
Other: English & Armenian (Fluent) | Eligible to work in the U.S. — no restrictions
